

QUARTZ

Transolid Quartz is made from 93% pure natural quartz and is the strongest natural stone surface on the market today. Our Quartz is non-porous, which means no sealing is necessary. Natural quartz is exceptionally hard, making it resistant to cracks, chips, scratches, and stains. Color consistency is an additional benefit of Natural Quartz.

No sealing, polishing, or reconditioning is necessary, so quartz vanity tops are practically care-free. You'll appreciate a range of warm earth tones and rich contemporary colors for achieving any look you desire.

2cm (3/4") vanity top thickness

Material is solid throughout its thickness.

Practically care-free

No sealing, no polishing, and no reconditioning

Stain-resistant and scratch-resistant

Quartz is exceptionally hard, making it the most durable countertop surface available.

Limited Lifetime Warranty

Transolid's Warranty protects you from manufacturer's defects for the lifetime of the product.
