

SOLID SURFACE

Solid Surface continues to be the material of choice for demanding wet environments in residential, commercial, educational, hospitality and healthcare settings.

Transolid Solid Surface material is made from a highly durable, non-porous polyester/acrylic composition that resists stains and heat up to 365°. Our Solid Surface is renewable throughout its lifetime and cleans easily with an abrasive cleaner. A Scotch-Brite® pad easily removes tougher stains like coffee, juice, berries and burns.

Not all solid surfaces are created equal. While some make the solid surface claim, often they're not a true, 100% solid surface and cannot offer the chip, scratch, stain and heat resistance of Transolid® Solid Surface.

Durable Solid Surface

Minor stains and scratches can be easily repaired. Resistant to scratches and stains because it is 100% solid through and through.

Seamless Design

Smooth integration of vanity top, bowl and backsplash. No seams means no places for dirt to collect.

Easy to Clean and Maintain

Solid Surface material cleans up easily with soap and water. Minor stains and scratches can be repaired with a Scotch-Brite® pad.

Non-porous, non-toxic and non-allergenic

The lack of porosity makes these materials stain-resistant, so they will have a long life. They do not emit any harmful toxins and are non-allergenic.

Complete customization

Customize with top shapes, edge treatments, bowl choices and locations, faucet locations, and more
